

I benefit from listening to XM Satellite Radio and its traffic and weather channels. XM satellite radio provides me a variety and quality that is not available elsewhere. Since this is a payed service, it should not be up to the National Association of Broadcasters to dictate what I are permitted to hear. I respectfully urge you to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I have come to expect from satellite radio.

This restriction would be like satellite or cable not being able to show the same movies that or provide the same services that network TV are able to show.
